Summarize the 1906 San Francisco Earthquake. What factors shaped the current landscape?

The **1906 San Francisco Earthquake** was one of the most devastating natural disasters in U.S. history. It struck on **April 18, 1906**, with an estimated magnitude of **7.8** along the **San Andreas Fault**, causing massive shaking across the San Francisco Bay Area. The earthquake and the fires that followed destroyed roughly **80% of the city**, leaving an estimated **3,000 people dead** and over **250,000 homeless**. Entire neighborhoods, including Chinatown and the downtown business district, were reduced to rubble.

Several key **factors shaped the current landscape** of San Francisco:

1. **Urban Reconstruction** – After the disaster, the city was rebuilt with stricter building codes and fire-resistant materials. This led to more modern infrastructure, wider streets, and the emergence of iconic architecture in neighborhoods like the Financial District.
2. **Land Use Changes** – Some areas, especially those built on landfill or unstable ground, were abandoned or redeveloped to mitigate future earthquake risks.
3. **Economic Shift** – The rebuilding process attracted investment and reshaped the city's economy, reinforcing San Francisco as a financial, commercial, and cultural hub.
4. **Population Redistribution** – Many residents who lost homes relocated, altering neighborhood demographics. Some immigrant communities, like in Chinatown, were forced to rebuild, which influenced cultural preservation efforts.
5. **Disaster Preparedness Culture** – The earthquake established a long-term focus on earthquake-resistant design, urban planning, and emergency response systems that continue to influence the Bay Area today.

In short, the 1906 earthquake didn't just destroy buildings—it reshaped San Francisco's **physical layout, economic centers, and cultural identity**, creating a foundation for the city's modern character.

If you want, I can make a **visual timeline showing the disaster and its urban impact**—it really highlights how the city evolved after 1906. Do you want me to do that?
