Summarize the 1906 San Francisco Earthquake. What factors shaped the current landscape?

The **1906 San Francisco Earthquake** was one of the most devastating natural disasters in U.S. history. It struck on **April 18, 1906**, with an estimated magnitude of **7.8** along the **San Andreas Fault**, causing widespread destruction. The earthquake itself caused massive structural damage, but **fires that broke out afterward**—which raged for several days—caused the majority of the destruction, consuming about **500 city blocks** and leaving an estimated **250,000 people homeless**. Death estimates vary but range from **3,000 to 6,000**.

Several factors from the earthquake shaped the modern landscape of San Francisco:

1. **Urban Reconstruction:** The city rebuilt quickly, modernizing its architecture and infrastructure. Many wooden structures were replaced with **steel and concrete buildings**, shaping a more resilient urban core.
2. **Street and Neighborhood Changes:** Entire neighborhoods were redesigned during reconstruction, with wider streets and updated utility systems, which influenced today's city layout.
3. **Population Shifts:** Some communities, especially working-class and immigrant neighborhoods, were displaced permanently, affecting the city's demographic distribution.
4. **Seismic Awareness:** The disaster prompted stronger **building codes** and earthquake-resistant engineering practices, influencing construction standards across California.
5. **Economic Transformation:** The earthquake accelerated modernization, prompting investments in banking, transportation, and real estate, which helped San Francisco recover as a commercial hub.
6. **Cultural Legacy:** The disaster is a central part of San Francisco's identity, influencing public memory, literature, and local planning philosophies.

Essentially, the earthquake reshaped both the **physical infrastructure** and **social fabric** of San Francisco, leaving a city more robust but also with altered neighborhoods and demographic patterns that persist today.

If you want, I can make a **visual timeline showing the earthquake, fires, and rebuilding** to make the transformation clearer. Do you want me to do that?
