Summarize the 1906 San Francisco Earthquake. What factors shaped the current landscape?

The **1906 San Francisco earthquake** was a catastrophic event that struck on **April 18, 1906**, registering an estimated magnitude of **7.8** along the **San Andreas Fault**. It caused widespread destruction across San Francisco and surrounding areas, but much of the damage resulted from **fires** that ignited in the aftermath and burned for several days. The earthquake and fires together destroyed over **80% of the city**, leaving roughly **250,000 people homeless** and causing an estimated **3,000 deaths**.

Several key factors shaped San Francisco's **modern landscape** as a result:

1. **Urban Reconstruction:** The rebuilding of the city introduced stricter **building codes** and fire-resistant construction, influencing the modern architecture and urban layout. Many iconic neighborhoods and structures, such as the **Financial District**, were redesigned with wider streets and more robust infrastructure.
2. **Economic Shifts:** The disaster shifted economic activity, with new investment in downtown areas and along the waterfront, helping transform San Francisco into a major commercial and financial hub.
3. **Population and Demographics:** The displacement of residents led to changes in neighborhood demographics. Some areas were abandoned or redeveloped, altering the social fabric.
4. **Infrastructure Modernization:** The earthquake highlighted vulnerabilities in water supply, transportation, and public utilities, prompting the creation of improved systems that still influence the city today.
5. **Geological Awareness:** The event increased awareness of seismic risk in California, shaping urban planning, zoning laws, and emergency preparedness policies that continue to affect how the city develops.

In essence, the 1906 earthquake was not just a destructive event—it **reshaped San Francisco physically, socially, and economically**, leaving a legacy that continues to influence its landscape and planning strategies today.

If you want, I can also make a **map showing pre- and post-1906 damage** to visualize the impact on the city layout. Do you want me to do that?
